CONDITIONS™ AIRPORT
PROVIDING A SOLID FOUNDATION FOR OPERATIONAL EFFICIENCY

Providing a solid foundation
for operational efficiency

Corvado Conditions™ Airport extends our Corvado Conditions™ Core app to provide hierarchical relationship management of locations which includes Organizations, Sites, Buildings, Floors/Levels, Spaces and Areas for airport specific facilities. This app improves airport operations by managing and reporting on terminals, gates, jetways and other airport specific data. It delivers a single source of truth, access to real-time data, enabling key stakeholders to make informed business decisions.

Highlights

Corvado Conditions™ Airport extends our Corvado Conditions™ Core app to provide airport specific functionality. The hierarchical relationship management of locations and assets is customized to support airport facilities. This app improves airport operations by managing and reporting on terminals, gates, jetways and other airport specific data.

GOVERNMENT

Standard Conditions™ Platform Benefits

- Cloud-based solution on a secure and reliable infrastructure
- Real-time data and single source of truth
- Compliance and accountability built-in to enforce standards
- Highly flexible and customizable
- Web and mobile-friendly functionality
- Modern and intuitive user interface
- Robust user security and access management
- Extensible to external users/partners via community access
- Mobile app optimized for Android and iOS devices
- ISO27001/27017, DoD IL2/IL4, NIST SP 800-171, Disaster Recovery & BCP, TRUSTe Certified

> **The Conditions™ Dashboards gives us vital real-time insight to the cleanliness status of our facilities. Data-driven decisions are made smarter and faster which helps us provide our customers with a safe, comfortable and clean environment. Its agile nature also allows us to support the processes resulting from these decisions; engaging our employees, partners and stakeholders to deliver excellence and exceed expectations."**
