

# **CONDITIONS™ ATP AND PH TESTING**

**SIMPLIFY THE TRACKING AND ANALYSIS OF ATP AND PH TEST RESULTS**

# Simplify the tracking and analysis of ATP and pH test results

---

The Conditions™ ATP and pH app simplifies the tracking and analysis of ATP and pH test results. Using real-time data, correlations of common patterns and trends can be better identified. The performance of in-field data collection and reporting is enhanced by leveraging our mobile app. Our audience-specific dashboards and reports provides insights into performance and efficiency.

# Highlights

---

Track and analyze ATP and pH test results. Schedule site treatments, record ATP and pH results pre- and post-treatment. Assess treatment efficacy. Visualize results and trends with audience-specific dashboards.

TESTING

## Testing Results

Organize, track and analyze ATP and pH test results. Correlate patterns and identify trends to enhance treatment efficacy.

MOBILE

## Mobile Data Collection

Mobile app enables intuitive data-entry while in field. Increase user adoption and productivity.
