MODERNIZE MANAGEMENT OF CLEANING SCHEDULES AND INSPECTIONS

# Modernize management of cleaning schedules and inspections

---

The Confi·Klean solution modernizes the management of routine and deep cleaning schedules while providing quality controls and insights into inspections. It consolidates cleaning operations into one platform providing a single source of truth that is accessible from most standard Internet browsers or Android or iOS mobile device. The benefits include rated scorecard of inspections, on-demand schedule changes, tracking of skipped cleanings, management of known blemishes (items that need maintenance, replacement or repair), cleaning of spaces and assets, cleaning crew accountability and a continuous feedback loop for process improvement. The solution empowers management with the ability to measure and track progress using the data collected for reports and dashboards. This increases the confidence levels of stakeholders regarding the status of facility cleanliness. This also provides more visibility to cleaning operations and supports decision making towards optimization.

# Highlights

---

Confi·Klean modernizes the management of routine and deep cleaning schedules while providing quality controls and insights. Consolidate cleaning operations into one platform for a single source of truth and access from an Internet browser or our mobile app.

SCHEDULE

## Cleaning Schedule

Manage tasks and schedules across multiple facilities. Assign work and schedule recurring actions. Make last-minute changes and publish in real-time.

INSPECTIONS

## Inspections

Quick and easy inspections from your mobile device. Attach pictures and video for easy reference.

# Standard Conditions™ Platform Benefits

- Cloud-based solution on a secure and reliable infrastructure
- Real-time data and single source of truth
- Compliance and accountability built-in to enforce standards
- Highly flexible and customizable
- Web and mobile-friendly functionality
- Modern and intuitive user interface
- Robust user security and access management
- Extensible to external users/partners via community access
- Mobile app optimized for Android and iOS devices
- ISO27001/27017, DoD IL2/IL4, NIST SP 800-171, Disaster Recovery & BCP,  
TRUSTe Certified

The Conditions™ Dashboards gives us vital real-time insight to the cleanliness status of our facilities. Data-driven decisions are made smarter and faster which helps us provide our customers with a safe, comfortable and clean environment. Its agile nature also allows us to support the processes resulting from these decisions; engaging our employees, partners and stakeholders to deliver excellence and exceed expectations."
