CONDITIONS™ CORE
PROVIDING A SOLID FOUNDATION FOR OPERATIONAL EFFICIENCY

Providing a solid foundation for operational efficiency

The Corvado Conditions™ Core app provides hierarchical relationship management of locations which includes Organizations, Sites, Buildings, Floors/Levels, Spaces and Areas. These customer defined assets provide a solid foundation for operational efficiency. Our app delivers a single source of truth, access to real-time data, enabling key stakeholders to make informed business decisions. In ever-growing enterprise organizations the need to aggregate assets for the organization is necessary. The Corvado Conditions™ Core app solves that problem by establishing the organization and the related assets and locations.

Highlights

The Corvado Conditions™ Core app provides hierarchical relationship management of locations and assets in a single source. In ever-growing enterprise organizations the need to aggregate assets for the organization is necessary. The Corvado Conditions™ Core app solves that problem by establishing the organization and the related assets and locations.
